Pizza box uncovers gorgeous Mahogany

This original top table top finish below, was so heavily shaded with a red pigment, that it almost completely covered the beautiful grain underneath. However, it wasn't until the hot pizza box left this typical, but unsightly white splotch, that we were asked to refinish the top as seen on the left, uncovering this beautiful bookmatched grain.

Refinishing doesn't have to be a major exercise or expenditure. Small jobs can make huge differences!
